## Objective

Pursuing a front-end developer / web designer position in a creative firm where I would be able to utilize my skills and creativity and contribute towards the company's success

---

## Employment

- October 2010 - Present, *Freelancing*  
**Graphics / Web Designer**  
Browsing through design contests, communicating with possible clients and understanding their requirements, whether; sketching a layout design and putting it together in Photoshop, or making logo drafts and creating them in Illustrator.
- January 2008 - August 2010, *GTO (Global Technologies Online)*  
**Front-end developer / Web designer**  
Responsibilities were starting from outlining the website's structure, to editing-retouching images provided by the client, creating templates for the layout and applying amendments following client's feedback until approval, coding the website using HTML, CSS and jQuery if needed, testing the website and making sure it's cross-browser compatible, coordinating with programmers throughout their scripting to maintain stability of the website's design and fixing any errors would occur, uploading the website to internet server using FTP software, adding approved content from the client into the website, making changes to the site if directed by client, working with project managers to ensure products are delivered on time and according to quality standards.
- June 2007 - December 2007, *Egysol*  
**Graphics / Web Designer**  
Retouching images and creating icons for live websites, creating logos, layouts and mockups for websites and control panels, making animated flash intros and banners

- January 2006 - April 2006, *Ameco Tech (011 Communications)*  
**Telemarketer**  
Making phone calls to new prospects from the company's database or existing customers and their referrals in order to make sales in landline and cell-phone lines, handling and responding to incoming sales inquires
